

SUMMER CAMPUS

FOR YOUNG TALENTS IN THE FIELD OF HEALTHCARE

19th to 23rd August 2024

Under A Cultural Umbrella – Lifelong Health, 3 ECTS

The demographic changes in the multicultural world and technological development challenge healthcare professionals to develop their competences in meeting diverse clients, learners, as well as colleagues. International exchange experiences enhance learners' awareness of cultural differences and make it possible to compare healthcare systems and practices. International exchange also has a positive effect on personal development and provides experiences that cannot be gained in a classroom.

Objectives *

- Students are introduced to the meaning of multiculturalism by learning from each other.
- Students will gain an understanding of the differences in healthcare systems in different countries.
- Students will understand issues related to health in different age groups.
- Students improve their language and cultural skills.
- Students and faculty members have a possibility to network during the Summer Campus and in future studies after the Campus.

** For Master-level students, the objectives are tailored for EQF level 7.*

The programme is available for all our partner universities all around the world.

Cost

EUR 650 per student (including VAT), minimum 15 students up to 25 students in total. Larger student group will lead to a higher cost.

The cost **includes** programme design and implementation, administration, tutoring, clinical visits, social activities, and transportation for on-campus activities.

The cost **does not** cover expenses concerning visa, international travel, accommodation, meals, or local transportation in Finland for any off-campus activities.

Content and preliminary schedule

The programme covers an introduction to lifelong health promotion, multiprofessional healthcare in Finland, and an orientation to Finnish culture and cultural comparison from both educational and practical viewpoints.

Jamk University of Applied Sciences reserves the right to make changes to the preliminary schedule. Clinical visits, cultural, and evening activities will be scheduled later.
