

Join Us for the Launch of the PROMINENCE Obesity Open Education Resource!

24 March 2025 | 13:00 – 13:45 CET | [Online Webinar](#)

We are delighted to announce the official launch of the PROMINENCE Open Education Resource (OER) for physiotherapy - we invite you to be part of it!

After months of collaborative development across our consortium of five European Higher Education Institutions and the Europe Region of World Physiotherapy, the PROMINENCE OER will be shared with the wider physiotherapy community.

Designed to support physiotherapy educators and learners alike, this free, evidence-based education resource addresses a critical gap in entry-level physiotherapy curricula: obesity and physiotherapy practice.

Join us on 24 March at 13:00 CET for a live webinar where we will:

- Officially launch the PROMINENCE OER.
- Share key outputs from the project, including the Obesity Competency Framework for physiotherapists and OER for physiotherapists.
- Signpost PROMINENCE OER content towards enhancing obesity education and clinical practice in physiotherapy.
- Open the floor for questions and discussion.

Whether you are a physiotherapy educator, student, researcher, or healthcare professional with an interest in obesity management, this webinar is for you.

Register [here](#).

The PROMINENCE OER is free and open to all.
